Response Attachment 200-125

The assertion in the problem statement of this RID is incorrect. The SDC, SIM, and BIN systems are all either completely Government Off The Shelf (GOTS) or partially GOTS. It is inappropriate for the CLCS to levy design and construction requirements on these systems since some of them are nearly completed. The RID is therefore rejected. However, since there is considerable confusion for the readers of the SLS as to why Design and Construction and other requirements are not being levied against the SDC, SIM and BIN, these paragraphs will be modified to describe the nature of the equipment (GOTS) and why the requirements aren't levied against them also.
